

Power Pro® - Quick Start Guide

Get to Know Your Power Pro Panel

Panel Operation

On/Off Button Press

For most buttons (lights, water pump) on/off functionality is present. White = On. Blue = Off.

Light Brightness

Light circuits can be dimmed and brightened. Press and hold light button you wish to brighten, and lights will incrementally brighten. Press and hold again to perform the opposite.

Extend/Retract

Awnings and slideouts can be extended and retracted with a press and hold on the corresponding button.

Voice
Tutorial

Your privacy is kept in mind.

Internet Connection

Your panel is not connected to the internet, and it is not recording any interactions. This ensures maximum security and privacy.

Wake Up Word

Power Pro only listens for the wake-up word and the command that follows afterward.

Mic Light

The mic is ready to listen for your wake-up word and command when the green mic light is on.

Note: Wait for system response before giving command.

Things to Try with Voice

Just getting back home?

Say "Hey, Power Pro" ... "I'm Home"

Is it movie night?

Say "Hey, Power Pro" ... "Movie Mode"

String Commands Together!

Say "Hey, Power Pro", you can then say multiple commands. Simply give the next command within 5 seconds of the last system response.

Power Pro Companion™

Say "Hey, Power Pro", then "Companion". This opens an AI-powered assistant. Ask questions about your RV! Internet required to function.

Things to Try with Voice in APP

Winding down for the night?

Say "Goodnight"

Full water tanks?

Say "What is my grey tank level?"

Press icon in APP

APP Download and Connection

1. Download the Power Pro APP

Visit the app store to install the Power Pro APP.

Apple
Store

Google
Play

2. Connect your device to the panel

- Turn on Power Pro panel.
- Once panel is booted up, press BT button once.
- Find and select panel ID on your phone/device.
- Press BT button on panel twice to confirm.
- You are now connected!

Need Help?

- Performance issue? Restart your panel.

APP Operation

All functions and monitoring features are available in the mobile APP.

Wi-Fi Connection

Connect your panel to a Wi-Fi network in the APP settings. Go to Wi-Fi Control.

Remote Mode

With your panel connected to Wi-Fi, control your RV remotely with Remote Mode.

OTA Updates

Over-the-air updates can be Completed through the Settings page in the APP. This allows new features and performance updates to install to your existing panel.
